**THE HELEN KIRKLAND TRUST FUND
FOR CARDIAC RESEARCH**
(Registered Charity no. 1073080)

Supports research into Long QT, which causes cardiac arrhythmia due to an electrical defect, and results in sudden and unexpected death in babies, children and young adults who are otherwise healthy.

The Helen Kirkland Trust Fund for Cardiac Research

As you will see we are hosting our annual March "At Home" days once again this year. These days are an important part of our fund raising activities. It is hoped that £100,000 will have been raised by the end of this year or early next.

We have been greatly encouraged by the loving and prayerful support that we have received since Helen died and we thank everyone who has encouraged us.

We hope you will continue to support the work of the Trust – Two Research Fellows and one Research scholar so far.

Please come to the "At Home" – bring your family and friends.
